ABIGAIL FINNIS

SOFTWARE DEVELOPER & APPLICATION DEVELOPMENT GRADUATE

Cape Town, South Africa • **Phone:** 063 162 4814 • **Email:** abby.alicia.f@icloud.com
• **Portfolio:** abigail-software.vercel.app • **LinkedIn:** in/abigail-finnis

PROFESSIONAL SUMMARY

Application Development graduate and Software Developer with a genuine passion for building responsive, reliable applications across mobile, desktop, and the web. Backed by a solid foundation in computer science and modern tools like C#, Kotlin, and SQL, I love bridging the gap between clean, user-friendly design and solid backend logic. I thrive in collaborative team environments where I can tackle complex problems, keep learning, and build software that makes a real impact.

TECHNICAL SKILLS

- **Programming Languages:** C#, Kotlin, Java, SQL, JavaScript, HTML5, CSS3
- **Frameworks & UI:** .NET (.NET MAUI, Windows Forms, WPF), Android SDK, Modern Responsive Web
- **Cloud & Databases:** Firebase (Authentication, Cloud Firestore), Microsoft SQL Server, Relational Schema Design
- **Tools & Methodologies:** Git, GitHub, Visual Studio, Android Studio, RESTful APIs, OOP, Clean Architecture, Data Structures & Algorithms

FEATURED PROJECTS

Table Valley Municipal Reporting Application *| .NET MAUI, C#, XAML, Custom Data Structures*

- Architected a responsive cross-platform citizen service application allowing users to report municipal issues, upload photo media, and monitor ticket progression in real time.
- Engineered priority-based request tracking utilizing custom data structures to enable rapid search, categorization, and efficient queue retrieval.
- Designed an intuitive, unified interface accommodating desktop and mobile form factors with robust form validation and error handling.

Native Android Cloud Platform *| Kotlin, Android Studio, Firebase Auth, Cloud Firestore*

- Developed a native mobile application incorporating secure user authentication (Firebase Auth), persistent sessions, and profile management.
- Configured live bidirectional cloud synchronization using Firebase Cloud Firestore for real-time document storage and multi-device data consistency.
- Implemented modern Android UI patterns using ViewBinding and background threading to ensure responsive, high-performance interactions.

Enterprise Business & Database System *| C#, .NET, Microsoft SQL Server, Windows Forms*

- Designed a comprehensive enterprise desktop system for business transaction auditing, record administration, and role-based operational tracking.
- Constructed normalized relational SQL database schemas with secure parameterized queries, preventing SQL injection and safeguarding transactional integrity.
- Built granular data filtering, custom reporting modules, and validation pipelines for automated record verification.

EDUCATION & QUALIFICATIONS

Bachelor of Computer and Information Sciences in Application Development (NQF 7)

The IIE's Varsity College (Emeris) | 2022 – 2025

- **Distinctions Achieved:** Principles of Security, Mobile App Scripting, Network Engineering, IT Professional Practice
- **Academic Leadership:** Served as Class Representative, coordinating student-faculty communication and technical project milestones.

Higher Certificate in Information Technology (NQF 5) | The IIE's Varsity College | 2022

LEADERSHIP & COMMUNITY ENGAGEMENT

- **Youth Leader | New Apostolic Church:** Organized regional community events, chaired weekly committee sessions, and provided mentorship to young adults.
- **Campus Brand & Digital Outreach | Varsity College:** Executed digital engagement campaigns on social platforms to promote tech symposiums and campus student initiatives.
- **Community Outreach Volunteer:** Spearheaded logistics, meal preparation, and distribution for local soup kitchens and community care programmes.

ADDITIONAL INFORMATION

- **Languages:** Fluent in English and Afrikaans
- **Professional Development:** Active participant in code reviews, technical workshops, and continuous modern software engineering learning
